

Selecting the Best Big-Screen Tablet For You

Big-screen tablets are for gamers who like to stay glued to their Modern Combat 4. They are for executives who do not like to carry heavy laptops for their presentations. They are for movie buffs who like to have their entertainment handy. In fact, 25.4cm (10-inch) tablets are for almost everybody. Gone are the days when tablet makers were wary about bringing out big-screen tablets and were investing primarily in small-screen devices. Today, 25.4cm (10-inch) tablets are the norm for Indian consumers. So let us see how we should choose one from the many big-screen tablets available today

The trend of big-screen tablets began with Apple's iPad, when the Cupertino giant launched its first-gen device that had a 24.6cm (9.7-inch) screen. The iPad is an undisputed king when it comes to tablet devices with this screen size. Following the footsteps of this iconic device, many other players ventured into this screen-size segment with attractive offerings at a more affordable budget. It did not take long for such
