

Experience thermal imaging

See what the human eye can't see

Spotpyrometer

Desperately searching
for the electrical fault

FLIR EX-Series

Found the electrical fault
INSTANTLY

Thermal imaging camera for fast electrical and mechanical inspections

Technology evolves rapidly. New technologies emerge and replace what once was considered high tech. Often the result is that you can perform your job better, faster and more efficient.

Measuring temperatures with a spotpyrometer to find potential problem areas is time consuming and not accurate at all. FLIR thermal imaging cameras give you an immediate overview of the situation. You will immediately see where the potential problem area is located on a crisp thermal image. After the inspection you can easily connect your FLIR thermal imaging camera to your PC for further analysis and to produce comprehensive reports. The result: faster, more accurate and more professional thermal inspections.

With the FLIR Ex-Series we offer you the perfect entry model into the world of thermal imaging.

Replace your spotpyrometer with a FLIR Ex-Series and enjoy the benefit of thermal imaging.
