

Is there something in the air?

We're used to formulating the right solution for production and design engineers, so creating a new brand identity for Electrolube was just another application of our innovative thinking.

Our new brand look, which better reflects our skills and values will debut this autumn. But right now we can deliver our renowned range of electro-chemical solutions, from world-class conformal coatings, thermal pastes and encapsulants to high performance cleaners and lubricants.

Clean, Protect, Lubricate

Electrolube products are specified and widely used for the manufacture and maintenance of electrical and electronic components and assemblies in various markets including automotive, aerospace, marine, medical, industrial and consumer electronics.

Contact Lubricants

Specially formulated greases and oils that reduce friction and enhance the electrical performance.

CG60 – Offers enhanced electrical and mechanical properties under the conditions required by today's automotive and domestic equipment industries.

SPG – Special plastics grease is a synthetic grease offering outstanding low temperature performance and excellent compatibility, even at elevated temperatures.

Conformal Coatings

DCA – SCC3 Conformal Coating

UL approved protection for PCB's from Chemicals & Solvents.

APL – Acrylic Protective Lacquer

Excellent temperature range and UV traceable.

Thermal Management

HTSP: Ultimate Thermal Conductive Paste

Providing 3W/m.K and temp range of -50 to 200 °C.

TCOR – Thermally Conductive Oxime RTV

A single part RTV which provides a high degree of thermal conductivity.

With a global reputation for research, development and production, earned in partnership with many of the world's best known manufacturers we are the solutions people.
