

Sony's Colourful Portable Chargers

Sony chargers are available in a selection of five different colours for users to match their smartphones

Sony has introduced its latest CP-V3 USB portable chargers in India. The chargers are available in a selection of five different colours for users to match their smartphones. The devices are small, compact and easy-to-carry, and weigh only 84 grams. According to Sony, they charge a smartphone quickly.

The CP-V3 USB portable charger has a capacity of 2800 mAh and output of 1.5A for charging smartphones on-the-go. It is based on the lithium-ion polymer technology. According to the company, the new charger retains more than 90 per cent of its capacity at 1000 charges. Users can conveniently charge the CP-V3 USB portable charger using a USB port on a computer or an AC adaptor.

The CP-V3 USB portable charger is ready-to-use straight out of its packaging. So even if you find yourself outside with a dying device, emergency power is immediately available upon purchase with the help of a micro-USB cable that comes with the portable charger. The chargers are the newest in Sony's line of accessories that go along with their Xperia Z1 and other smartphones.

Lenovo's New Yoga Line of Tablet Devices

The Android-based tablets have a magazine-inspired design and offer 1280x800-pixel resolution

Lenovo has recently added two new devices to its Yoga line of Android-based tablets. The two devices come in 20.3cm (8 inches) and 25.2cm (10 inches) variants. Even though the tablets have been launched as part of the Yoga series, Lenovo has been using the same branding for its notebooks as well.

The new Lenovo Yoga tablets reportedly have a magazine-inspired design and offer 1280x800-pixel resolution. The devices are powered by a 1.2GHz MediaTek MT8125 quad-core

processor for the models not offering 3G. For the 3G models, the MediaTek MT8389 quad-core processors have been chosen.

The tablets have 1 GB of RAM and run the Android 4.2.2 Jelly Bean operating system. In addition, the devices have 16GB and 32GB internal storage options. The battery

life of the devices is reportedly 16 to 18 hours. The devices are priced at \$249 for the 20.3cm (8 inches) version, while the 25.2cm (10 inches) version costs \$299.

ASUS Brings World's Smallest Router to India

The device will offer convenient and quick Internet access for travellers and integrates full capabilities in the smallest-sized router produced to date

ASUS has launched world's smallest router, dubbed WL-330NUL, in India. The device claims to offer convenient and quick Internet access for travellers and integrates full capabilities in the smallest-sized router produced to date. It was created specifically for customers who travel frequently, especially those who use ultrabooks, smartphones and tablets to get online.

WL-330NUL provides quick secure network setup and connection sharing with other users and works with multiple operating systems, including Windows 8, Mac OS and iOS. The device has been engineered to offer full-fledged

router functionality in a miniaturised form factor. It operates in multiple modes, including router, Ethernet, Wi-Fi hotspot and access point. Its flexibility and convenience allow easy Internet service sharing across several devices, regardless of whether only wired or wireless connectivity is available. WL-330NUL measures 6.5 cm in length and weighs 17.5 gm, making it as easy to carry and handle as a USB stick.

With its router capabilities, WL-330NUL allows sharing a single connection on multiple devices without having to pay for additional accounts or apply for new log-in information. It

pairs easily with ultrabooks via USB.
