

PROTEUS VSM

cybermotion

Key to Succeed in Complete Embedded Solution

Cortex-M3/LM3S

ARM-7/LPC 2000

8051/52

PIC Bundle

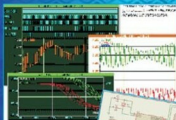

DsPIC-33

Atmel AVR Bundle

Motorola HC11

8086 Processor

Arduino

MSP 430

PICCOLO DSP

Parallax Basic Stamp

Featuring a brand new application framework, common part database, live net list and 3D visualization, with an ability to **Design, Develop, Debug and Simulate** any **Microcontroller code** in a context of mixed mode SPICE circuit simulation.

Features

- Industry De facto embedded software.
- Unique virtual system modelling software.
- Direct CAD/CAM, ODB++, IDF and PDF output.
- Over 35 k schematics & PCB library parts.
- Mixed mode SPICE simulation engine.
- PCB module integrates auto Route/Placement, Power planes, 3D viewer, etc.
- Co-Simulation of 8051, AVR, PIC, ARM, PICCOLO, MSP 430, Arduino AVR, and many more...

Educational Need

- Regular Laboratory & Embedded project.
- Enhance Students Employability.
- Research & Development and Innovation.
- Faculty Development program.
- Multi disciplinary software.
- Enables re-use of blocks across multiple projects.
- Complete industrial relevant software.

Industry Relevant

- An Experimental Canvas for Design.
- Write Firmware for Virtual Hardware.
- Research and Development.
- Fewer Design Iterations.
- Enables Parallel Development.
- Reduced Development Time.
- Reduced Debugging/Testing Time.
- Reduced Equipment Costs.
