

Zync Z605 Android Phablet

The dual-SIM device weighs around 250 grams

Zync, the Indian smartphone maker, has fuelled the phablet war even further with their new Android device dubbed as Zync Z605. It has a whopping 16.5cm (6.5-inch) display.

The device supports dual SIM and runs on Android 4.2 aka Jelly Bean OS. It has a TFT capacitive multi-touch display with 800 x 480 pixel resolution and is packed with an unspecified dual-core processor. It features 512MB of RAM. On the camera front, the Zync Z605 has a 2MP rear camera and 0.3MP front camera. The 4GB in-built storage of Zync Z605 is expandable up to 32GB via microSD card. The connectivity options of this Android phablet include Wi-Fi, Bluetooth, GPS and 3G. Weighing around 250gm, it is juiced up by a 2500mAh battery, promising up to six hours of talktime whilst you are using a 2G connection, which is reduced to 2.5 hours when using 3G. It is pre-loaded with apps like Facebook, Twitter, Viber and WhatsApp.

Zebronics Introduces New Tower Speakers

Offer three-dimensional concert-hall sound

India's leading supplier of products and accessories for computers, consumer electronics and communication under the brand ZEBRONICS, has extended its line-up of speakers in the Sound Monster range with its latest model – ZEB-T7400RUCF Tower Speaker system. Dubbed 'Bring Home the Party' – the new speaker is housed in full wooden enclosure for a base-heavy immersive music experience. The high-gloss piano black front panel and chrome trims give it an elegant look, whilst a natural wood finish on the box would complement the décor of any living room or bedroom.

The speaker system is designed such that it can be positioned anywhere in the room for 60W (RMS) of full, three-dimensional concert-hall sound and become the centre of attention at any family occasion, providing a DJ ambience. Audiophiles will love the high-quality sound coupled with multiple functionality that includes dual-MIC karaoke function (wireless microphone is part of the package). Dual 20cm (8-inch) drivers for low range, 10cm (4-inch) drivers for mid range and 4cm

(1.5-inch) dome tweeters for higher frequency provide room filling sound. The drivers' inherent stiffness, low mass and self-damping properties allow them to deliver clean, accurate sound.

Side volume controls, woofers, front ports with LED display all come in superior chrome finish.

In addition, input ports on the side provide the capability to connect the sound source to any digital device such as phones or media players via standard accessory cable. A memory card slot and USB port provide capability to play audio directly from SD/MMC cards or USB flash device. A built-in FM radio receiver and an advanced remote controller complete the system.

Whether using it as a standalone music system, or as a part of media player or to complement a large-screen TV, the feature-rich Zebronics Sound Monster ZEB-T7400RUCF brings a new level of affordable performance (and bling) to the tower speaker market. It is available at major IT accessories markets, retail IT outlets as well as Zebronics e-commerce site www.moneyvasool.com.
