Google's Nexus Wireless Charger is Available in India

"Featuring a clean, compact design, the Nexus wireless charger adheres securely to a desk, nightstand or counter-top for grab-and-go charging," is what the Google Play describes Nexus Wireless as. Latest in the range of their aggressively launched accessories for Nexus range of devices, search engine giant Google has announced that it has begun selling Nexus wireless charger in four new markets: Australia, India, Japan and Korea. It is priced at ₹ 3299 in India.

Samsung Galaxy S3 Gets Android 4.3 Update in India

Samsung has started rolling out the much-awaited Android 4.3 update for the Indian devices. The update is available over the air (OTA) and via Samsung Kies software. With this, the Galaxy S3 will get features including Knox security platform, Smart Switch, HomeSync, Group Play 2.5, updated user-interface and better DayDream feature. Users will get an OTA notification automatically, but if you are one of those who cannot wait for it, Samsung Kies software is the way to go. You can manually download it by going to Settings << About Phone << Software update << Check for updates. The size of the OTA update is 408MB.

No BBM App for Windows Phone

In a major blow to the Windows Phone platform, Blackberry has said it is not in the process of developing the acclaimed BBM app for the same. One would have naturally thought BlackBerry might be busy developing a version of the messaging app for Windows Phone devices, after its success on Android and iOS platforms, but it is not true. BlackBerry has quoted that the decision of bringing BBM to Windows Phone is entirely market driven, and only when the customers demand it in 'sufficient numbers' will BBM be considered for the platform. As of now, a lack of consumer demand for the app is stopping them from developing such a product. However, the possibility of BBM coming to Microsoft's OS in the future cannot be ruled out completely.

Oplus XonPad7 Tablet

Powered by quad-core 1.2GHz processor
