degree and experience, professionals' pay package is a mix of fixed salary (₹ 6,00,000 to 20,00,000 per annum), company shares,

and performance bonuses." On a similar note, Ravinder Gujral, director, Dexcel Electronics Designs Pvt Ltd shares, "We

always look out for bright engineers in the area like FPGA/ASIC design and verification along with board design and embedded software. The salary range for verification and validation engineers usually depends on their technical aptitude and experience. Engineers with around 2-3 years of experience typically get salary around 5,00,000 to 7,00,000 rupees per annum."

It is not just programming

Ensuring that designs meet requirements could be a challenging task, but a career in this field has its own rewards and perks. VLSI/semiconductor domain has been a vibrant, albeit small field (relative to its software sibling) since last 15+ years in India, believes Ajeetha Kumari. She says, "It is driven by passionate electronics engineers than by just those who seek some quick success."

In brief, this domain requires engineers with deep electronics knowledge and also various other skills in adjacent domains. ●

Membrane KEYPADS ▶▶

Display In Excellence

Features

- Advance Technology
- Reliable Quality
- Accuracy in Printing

Manufacturers of :

- Membrane Keypads
- Graphic Overlays
- Vinyl Stickers
- P.U. Dome Stickers
- Aluminium Labels
- E. L. Lamps

Shakti Keypads Pvt. Ltd.
