

Spot an Error

And WIN Award!

You can win one thousand rupees plus a certificate from the editor of Electronics For You magazine if you spot and report any factual error in the latest issue of the magazine. Your report will be published in a coming issue of the magazine, giving credit to you.

Though every care is taken in preparation of the content for the magazine, an error can slip in at times. So we invite our learned readers to point out any error that they spot, for the benefit of the other readers.

Rules:

- The error has to be reported before end of the month that is mentioned on cover of the magazine
- The report has to be sent in writing or by email addressed to the Editor, EFY Magazine (editsec@efyindia.com)
- The error should be of factual nature, in the information published in the magazine, and not a grammatical or syntax error
- The correct information should also be provided along with the error spotted by you
- In case more than one person reports the same error, the one whose report reaches us the earliest will get the award money
- In case two or more persons jointly report an error, the award money will be divided amongst them
- EFY employees, their family members and friends, and EFY associates and their family members and friends are not eligible
- Decision of the editor will be final in this matter

electronics
FOR YOU

respectively, getting rid of a separate heat-sink. The UFL bulbs are repairable and cost-effective—expected to pay back four to five times their cost—and are estimated to save 50-60 per cent energy as compared to CFLs. These eco-friendly UFLs do not contain any mercury or gas.

TEST & MEASUREMENT

500MHz signal and spectrum analyser

Rohde & Schwarz expanded the analysis bandwidth for its R&S FSW high-end signal and spectrum analysers. In the past, 320MHz was considered an excellent value. Rohde & Schwarz is the first company to offer analysis bandwidth of 500MHz. The new R&S

FSW-B500 hardware option is now available for all analysers of the R&S FSW family and can therefore be used for measurements in a frequency range up to 67GHz.

Handheld thermal imaging camera

FLIR Systems launched a handheld thermal imaging camera, the FLIR i3, at an affordable price of ₹ 54,000. This promotional offer will be valid in India up to March 31, 2014. The FLIR i3 is the smallest, lightest and most affordable true thermal imaging camera in the market, according to the company. It is incredibly easy to use and requires no former experience. This camera visualises the temperature distribution across entire surfaces of machinery

and electrical equipment, quickly and accurately.

High-speed arbitrary waveform generator

Agilent Technologies upgraded its M8190A by including streaming and multichannel synchronisation functionality. For engineers working on applications like low-observable radar or high-density communications, the new functionality makes testing more realistic with long playtime and parallel signal generation for multi-emitter support. The M8190A now can generate waveforms while downloading new waveforms into memory

Multi-function meter

Pyrotech Electronics upgraded its multi-function meter, the MFM101, which is specifically designed for measuring AC power-line parameters like voltage, current, wattage, energy, power factor and frequency. This single unit can replace all the discrete single meters. Its features include over 90 power and energy parameters, the modbus (RTU) communication protocol, a temperature range from 10°C to 35°C, an LCD display with a white backlight, a wide power supply range, the capability to measure import and export energy and the total as well as net energy, and many more features.
