

Why Choose the New Colibri VF50 & VF61

Powered by Freescale® Vybrid™ SoC

- ✓ **World's most cost-effective** Computer-on-Module
- ✓ **Single core:** ARM® Cortex™ A5 400MHz | **Dual core:** ARM® Cortex™ A5/M4 500/167 MHz
- ✓ Featuring **on-chip encryption, secure boot, anti-tamper, and anti-clone capabilities**
- ✓ Also featuring a **host of industrial interfaces** | CAN, I2C, PWM, UART, Ethernet, GPIOs (upto 101)
- ✓ Available in **Industrial Temperature** versions | -40°C to +85°C
- ✓ Comes with **Windows Embedded Compact 6.0 and Linux**
- ✓ **Long term module availability**, until 2028

Access Control & Security Systems

- Energy grid protection
- Infrastructure control
- Kiosk with 2d display

Energy & Power

- Power Inverter
- Industrial Pump or fan
- Appliance with motor

Medical & Healthcare

- BP Monitor
- Portable Patient Monitor
- Activity and Wellness Monitor

Robotics & Industrial Application

- Service Robot
- Industrial vehicle with control
- Industrial scanner or printer

Product Compliances

Toradex Network

Global Leader in embedded ARM Computer Modules
