

Your Smart Grid Partner in Communication and Computing

Moxa Solutions Make Grids Smarter and More Efficient

- » **Renewable Energy**
 - Industrial Ethernet Infrastructure Solutions
 - High Performance Serial-to-Ethernet Solution
 - Data Acquisition and Computing Solutions
- » **Intelligent Substation**
 - IEEE 1613 and IEC-61850-based Substation Ethernet Switches and Embedded Computers
 - 1U, 2U and 4U Rackmount Installation For Easy Implementation
- » **Advanced Metering Infrastructure**
 - Reliable Wireless Solutions (GSM/GPRS/EDGE/3G)
 - Serial-LAN AMR Solutions
 - Real-time, Web-based Communication Platforms

Moxa has 26 years of experience and know-how in providing world-class industrial communication and computing products and networking infrastructure solutions for harsh, industrial applications. We provide products and solutions to make grid smarter and more efficient, from power generation to distribution to power use in the household, and the renewable energy operations integrating the local micro-electricity to replace more traditional power supply sources. By optimizing the electric power grid we can get more out of the existing infrastructure without needing to invest a lot of capital in new technology.
