

## HMDX Audio's Jam Collection Speakers

The collection consists of the Jam Classic, Jam Plus and the Jam Party speakers

HMDX Audio has launched its Jam collection of Bluetooth speakers for Christmas. The collection includes the Jam Classic, Jam Plus and Jam Party. The Bluetooth speakers are available in bright colours including lemon, pink, blue and others, and can also be paired with Bluetooth-enabled devices for true stereo sound. The built-in rechargeable battery makes them last a long time.

HMDX JAM Classic can be paired with any Bluetooth-enabled device, up to nine metres away. The built-in rechargeable battery delivers up to four hours of wireless play.

HMDX JAM Plus is apparently one of the first Bluetooth speakers in the market that can be paired with another JAM Plus for true stereo sound. It features a re-chargable lithium-ion battery that can pump out six hours of continuous play.

Price: ₹ 2150

## Sony Unveils World's First Full-Frame Mirrorless Cameras

The α7 and α7R cameras are significantly smaller, lighter and more portable than any other full-frame interchangeable lens camera

Sony's new α7 and α7R digital cameras are the world's smallest full-frame interchangeable lens models.

The α7R model features a 36.4 effective megapixel 35mm Exmor CMOS sensor—the highest resolution sensor in the history of Sony's α line—with no optical low-pass filter for added resolving power and increased image detail. The α7 model boasts an impressive 24.3 effective megapixel 35mm Exmor CMOS sensor and an innovative fast Hybrid AF system.

Price: Around \$2000 to \$2300

Each camera is equipped with advanced imaging features including a powerful new BIONZ X processor; fast AF capabilities; a clear, bright XGA OLED Tru-Finder, Full HD 60p video recording, Wi-Fi and NFC connection, dust and moisture resistance and more.

Users can preview all changes to photographic settings in real-time on the high-contrast, 2.4 million dot XGA OLED Tru-Finder or the high-resolution tiltable 7.6 cm LCD screen.

## Toshiba Launches 4K Ultra HD TV Series

The new Toshiba L9300U series TVs deliver the ultimate viewing experience for movies, sports, video games, photo viewing and more

Toshiba America Information Systems, Inc. has launched the L9300U series of 4K Ultra HD TVs that are available in 147cm (58-inch), 165cm (65-inch) and 213cm (84-inch) screen sizes. The TVs are powered by Toshiba's proprietary second-generation CEVO 4K Quad+Dual Core Engine. Sophisticated technology such as resolution restoration, colour restoration and surface brilliance enhancement create pristine, life-like images. These models also feature a stylish design with gun-metal trim and matching frame stand to deliver a modern, yet elegant, appearance. The

new Toshiba L9300U series TVs deliver the ultimate viewing experience for movies, sports, video games, photo viewing and more.

Price: \$3999 to \$16,999

Although these units are shipping with HDMI 1.4 level capability, Toshiba will also provide a free firmware upgrade to HDMI 2.0 level capability for a limited period to support 4K 60 fps content.

Whilst many brands are just getting started in Ultra HD, Toshiba's CEVO 4K engine is second-generation technology and now it is adding HDMI 2.0 level capability so users can enjoy the amazing picture quality with high-speed 60fps 4K content.
