

LAN connection for Raspberry Pi and your TV.

1. Plug in your Wi-Fi dongle (I used a nano Wi-Fi dongle with 802.11n support) into the USB port. Now there are only two USB ports in Raspberry Pi, so you will have to use a USB port hub to get extra USB ports available to plug in Wi-Fi dongle in addition to the existing USB keyboard and mouse. Please note that the USB hub should have its own power supply.

2. Go to 'Program' menu option in the XBMC screen and click to enter.

3. Then select 'Addons' option and click on 'Get More...'

4. After a while, the screen will refresh and present a list of program add-ons which you can install and try out. The one which we are interested in is 'Network Manager.'

5. Select 'Network Manager' and in the subsequent screen, click on 'Install.'

6. Once the installation is complete, XBMC will show 'Network Manager

Fig. 2: Remote control app on iPhone

Add-on Enabled' message at the bottom of the screen.

7. You can exit out by a 'right-click' or use 'Home' icon at the right-bottom corner.

8. Go back to 'Program→Add-ons' and select 'Network Manager' which is now listed under available/enabled add-ons.

9. A window will appear listing a 'default Wi-Fi network.' Click on 'Add'

button and enter the add-on. This will display a list of available Wi-Fi connections in your range.

10. Select your Wi-Fi network and enter the secret/pass key (if Wi-Fi network is protected) and close the window using 'x' button on the top-right

corner.

11. The selected network shall appear in the previous pop-up screen with status connected. You would also see a 'Network connected and xx.xx.xx.xx IP address' message at the bottom of the XBMC screen.

Now you are all set with a Wi-Fi network connection and you can safely unplug the wired LAN cable.

At this point, it is advised to shut

Electrical and Electronics Products Testing & Certification Services

Your passport to Worldwide Markets...

■ Product Testing:

- Electrical Safety / EMC
- Wireless and Radio communication
- Environmental Simulation
- Solar Photovoltaic Compliance Solutions
- ATEX
- NEBS / Mobile Conformance Testing
- IT Interoperability
- Performance / Energy Efficiency / Eco design
- Green Compliance Solutions

■ Product Certification:

- RoHS, REACH, ELV, IECEx and IECEx CB Scheme for International Markets
- CE marking Notified Body
- NRTL/SCC/TCB for North America
- NF/GS for Europe
- CCC/BSMI/GOST R for Asia

Access to 150+ countries via International Approvals service

■ Local Test Services for...

- Luminaires & Street lighting
- Small Household / Kitchen Appliances
- Refrigerators / Ice-making machines
- Audio-Video Products
- ITE/ Electronic products
- Automatic Dispensing & Commercial vending machines
- Storage water heater, Microwave oven
- EMF / Ingress Protection / Flammability
