

Automation

In today's changing environment and need for better productivity, industrial automation is growing by leaps and bounds. This month we have some online resources that will help you catch up with the latest trends in automation

learn.automationdirect.com

Learn.AutomationDirect.com is an online streaming tutorial site offering on-demand video tutorials on a wide range of practical industrial automation products. This site also hosts many useful links that direct you to different resources on automation. It is also a part of Automationdirect.com, originally founded as PLCDirect in 1994, which has quickly grown from a small-time PLC company to a well-recognised name in the industrial automation market.

Control.com

Control.com is a discussion forum that has grown out of the Automation List online forum, which was started by Ken Crater in 1994 with a small group of people who wanted to talk about automation control. Today, the Automation List has grown to hundreds of subscribers from scores of countries around the world. The site claims that on an average workday, it records over 30 messages contributed to the list, with a high degree of interaction taking place on many threads. Control.com and the Automation List offer many possibilities for interaction, learning and professional advancement.
