Sensors market in consumer electronics is in growth stage and contains a great potential across industry verticals such as entertainment, information technology, communication products and home appliances, and it is expected to reach \$29.25 billion by 2020.

Taiwan hardware park to come up near Bangalore

The first country-specific industrial hub, the Taiwan hardware park, will be rolled out in Bangalore soon. The park is expected to come up on land near Devanahalli, on the outskirts of Bangalore city, and has been allotted by the state government. So far known as a software hub, Bangalore is now fast catching up on the hardware front too.

₹ 4000-million solar power project in Boudh

Odisha's state energy department has planned to set up a 50MW solar power project. The project will be implemented at Mamunda of Boudh district with an investment of around ₹ 4000 million. This power plant will be established by Green Energy Development Corporation of Odisha Ltd (GEDCOL).

Deity's \$100-million private equity fund plan on hold

Owing to some objections by the Planning Commission, Deity's plan to pick up a stake in a \$100-million private equity (PE) fund has been stalled for the moment. According to reports, the planning commission feels that there should be at least two bids before it agrees to invest in a PE fund. They have become cautious of all government investments recently.

UP government promoting IT industry

Right from e-governance schemes to distribution of 1.5 million laptops to the students in the state, the Uttar Pradesh government is in the process of finalising plans for boosting the IT industry in the state. The recent eUttarPradesh event has also highlighted the initiatives of the state in this direction.

Philips unveils new logo and tag line

Royal Philips has come up with a new global brand identity with a redesigned logo and a new tagline after extensive research. The company's new tagline now reads 'Innovation and you' instead of 'Sense and simplicity' and its 80-year-old logo of a shield has been replaced with a new design.

hold over the next five years driven by rising demand in fast-growth market in Asian and other emerging countries.

Major companies are located in Japan, South Korea and Taiwan region and are dominating the consumer electronics industry growth.

A joint venture to produce world-class power resistors in India

K.S. Instruments Pvt Ltd (KSI), Widap AG, Switzerland and Krah Group, Germany recently announced a joint venture to produce world-class power resistors in India. The joint venture will operate under the name KWK Resistors India Private Limited and will be based in Bangalore.

The joint venture puts together the resources and expertise of KSI, Krah Group and Widap into one entity. KSI will own 40 per cent of the joint venture, with the Krah group and Widap owning 30 per cent each. The joint venture will capitalise on KSI's expertise in industrial power resistors, Krah's strength in wire-wound resistors, metal-clad resistors, resistors for the automotive markets and Widap's expertise, especially in transit resistors and customised load banks.

AIPTIA's Consumer Electronic Imaging Fair 2014 to be held in Mumbai

All India Photographic Trade & Industry Association (AIPTIA) has announced

19th mega show titled 'Consumer Electronic Imaging Fair-2014'. This fair will cover a total area of 20,000 square meters, with a view to provide a broader platform, to meet the increasing demand of exhibitors of consumer imaging products.

AIPTIA is the knowledge hub around which all the activities of the photographic trade and industry revolve. Members of the association include prominent industry names like Sony, HP, Kodak, Canon, Nikon, Samsung, Konica, Epson, Fuji and others.

In a span of four decades, the association has conducted 18 mega fairs. It is a non-profit association. The fair will gather together comprehensively all service providers involved with the consumer electronic imaging industry and a footfall over 100,000 visitors is expected from India and abroad.

M2M market in India to grow at CAGR of 33 per cent from 2012-2016

According to Research and Markets' latest report—Machine to Machine (M2M) Market in India 2012-2016—is expected to grow at CAGR 33 per cent from 2012 to 2016. The new income opportunities generated through the adoption of M2M technology constitute one of the key factors for this market growth. The M2M market in India has also been witnessing a shift from voice services to data services. However, the lack of coordination amongst the members of the fragmented value chain could pose a challenge to the growth of this market.

India loses approximately US\$10.20 billion each year due to power thefts. As a result, India is planning to roll out smart meters in the Power sector. The Indian Government is mainly responsible for the huge penetration of broadband services at a rural level. The Government of India has initiated a national fibre network for 250,000 gram panchayats (local government in villages and small towns) for broadband connectivity. In addition, the governments have also taken other initiatives such as electronic point of sales machines, automated meter reading and tracking devices in logistics for the welfare of the society.
