

Buying a Smart TV

Buying a smart TV is an expensive proposition. So, before you invest here are some tips

PRASID BANERJEE

Now we live in the age of smart televisions, with full-HD (FHD) and ultra-high-definition (UHD) resolutions. Smart TVs are new-age devices, which emphasise on the integration of 'smart' technology, Internet, etc to enhance viewer's experience. Consequently, less attention is paid to traditional television watching, which is being replaced by online streaming, etc.

The TV technology is changing so fast that you cannot just visit a store, look at a few televisions and buy the one you find most appealing. Samsung's F9000 140cm (55-inch) TV, for instance, starts at Rs 319,000 and, for that kind of money, it is more than just a television. Enter smart TV interface and there is much more to look forward to in it than a big screen and good picture quality. There are apps you can play around with, social networking and Internet integration.

There are some things you must know when buying a smart TV. These include additional devices that you must

use along with the TV, such as router for Internet connection. Also, the TV system functionality should match with your usage and lifestyle. According to a salesperson from an electronics retail chain, people have not understood the real meaning of smart TV till now. They often ask irrelevant questions and even expect their TV to be a complete computer.

Indeed, the first mistake that a buyer can make regarding a smart TV is to expect too much. These TVs already offer way more than traditional TVs,

so it is easy to get carried away. Smart TV is the one that incorporates Internet in order to provide Internet-based features like streaming and apps. These are coupled with older technologies like LED, FHD and UHD to provide an enhanced viewing experience.

For Internet connection, the TV needs to be connected with a router. A smart TV connects either through an Ethernet port or a wireless connection. So, when buying a smart TV, you have to consider which one suits you more. For establish-
