

Unrestrained Storage and Connection

Data storage no longer be bound by transmission wires

GDM-8300 Series 50000 Counts Dual Measurement Multimeter

GW Instek rolls out the new generation Dual Measurement Multimeter – the GDM-8300 Series, which has two models - GDM-8341 and GDM-8342. Its exceptional features include 50,000 counts, dual measurement, 0.02% basic DC voltage accuracy, data logger through a USB flash memory to provide users with measurement precision, lucid data observation, and convenient data utilization. The GDM-8300 Series offers one more method for data storage and transfer – through USB interface (virtual COM port) and optional GPIB interface (must be installed in factory) for automatic measurement system users to conveniently save and retrieve data. The GDM-8300 Series not only supports the fundamental measurement items provided by general multimeters, but also equips with capacitance and temperature measurement functions. Furthermore, the GDM-8300 Series also provides many auxiliary functions to meet the measurement requirements for manufacturing process tests, educational experiments and testing facilities.

FEATURES

- 50000 Counts Vacuum Fluorescent Display with Two Colors
- Dual Measurement
- Fast Measurement Rate Up to 40 readings/s for DCV
- 0.02% DCV Basic Accuracy
- Auto/Manual Ranging
- True RMS (AC, AC+DC)
- 11 Measurement Functions
- Max./Min.,REL,MX+B,1/X,Ref %,Compare,Hold,dBm
- Standard USB Device for Communicating to PC
- Temperature Measurement (GDM-8342 only)
- USB Storage for Data Collection (GDM-8342 only)
- Optional GPIB (factory install for GDM-8342 only)

Data Logging

Unit can be used as data logger by saving measured data directly into a USB Flash Drive

Dual Measurement

Unit allows using the 2nd display to show another item, thus viewing two different measurement results at once.
