

a significant number of resources towards this project. The report quoted Anil Nanduri, who is amongst those in charge of the project, saying that features like gesture recognition and voice, should make devices more intuitive, natural and immersive. He says that perceptual computing aims to make computers more like humans.

Through this, machines will be able to sense the emotions of a person and detect biometric data just through their cameras. They will understand commands such as 'play me some jazz' and will be able to hold complete conversations with the users. They will also be able to create more realistic augmented reality effects and will be able to detect and do much more than usual.

Now your ring will bring mobile notifications to your fingers

A new wearable gadget allows you to receive all your updates from your mobile through a ring on your finger. Dubbed as the Smarty Ring, the device connects to your smartphone using the Bluetooth 4.0 technology and gives you real-time updates from Skype, Twitter and Facebook. So, no more rummaging around for your phone whilst you are driving or otherwise engaged. The technology will be especially useful with the big-screen devices like the Galaxy Note 3 or the Lenovo K900, which often become hard to manage.

The remote control features on the ring allow users to accept or reject calls and trigger the smartphone's camera through it. In addition, you can also change the user profile and play music without having to pull out your phone. It also incorporates the smartphone's clock into it, allowing you to access features like the stopwatch, alarm and the countdown timer. Plus, it acts as a security feature and starts beeping when you are over nine metres away from your phone.

World's first 3D metal printer

You have definitely heard of 3D printers and how they are used to make all kinds of plastic goods. Well, if you thought that plastic was all they could deal with, think again. A team of scientists, led by one Joshua Pearce from the Michigan Technological University, have developed the world's first 3D metal printer.

Whilst the device is not quite perfect yet, it is an open source device, meaning that all its firmware and software are available to anyone who wants to try their hand at perfecting it. In fact, Pearce has reportedly admitted himself that there would be someone making a better machine than his team's version, within a month. The team has made use of materials worth \$1500 in order to build the device. This includes a commercial MIG welder along with an open source microcontroller. The new 3D printers can build objects using sheets of metal.

That is not the only impressive bit about Pearce's printer though. Commercial metal printers have been available for some time now. But, they all cost lots of money, ranging

BINAY PowerLED
Inspection Hand Lamp

BOX Design

LINEAR Design

BINAY PowerLED Inspection Hand Lamps utilize a light source comprised of multiple high power white LEDs

- Very low power consumption of 10 watts or less
- Long life (over 50,000 burning hours), covered under 3-year warranty
- Unbreakable shock-proof and vibration-resistant construction; cool light output with no heat radiation
- Glare-free light output, focusing only on the work area

Binay Opto Electronics Pvt. Ltd.
 44, Armenian Street, Kolkata 700 001, India
 Telephone: (033) 4006 9875, 2210 3807, 2210 2039
 email : info@binayled.com
 Fax : 91-33- 2242 1493 <http://www.binayled.com>

INVENTING NEW TECHNIQUES OF PRODUCING LIGHT

BINAY PowerLED-based
Industrial WELL GLASS Luminaires

BINAY's PowerLED Well Glass luminaires replace Conventional HPSV and HPMV well glass fittings

- 65%-70% LOWER power consumption over HPSV or HPMV
- Life of 10 to 15 years - requires no replacement once fitted
- FIVE-YEAR warranty
- Instant turn-on to full brightness
- Full-spectrum white light provides greater clarity and visual acuity; improves visibility and safety
- Optimized thermal management design for long life of LEDs
- Constant light output over 100V-260V operation
- Eco-friendly; eliminates hazardous disposal costs
