

CAD CONNECTED

PROTEUS VSM DESIGN SUITE 8.1

Design, Develop, Debug and Simulate.

Featuring a brand new application framework, common part database, live netlist and 3D visualization, with an ability to co-simulate both high and low level microcontroller code in a context of mixed mode SPICE circuit simulation.

Features:

- Industry De facto embedded software.
- Unique virtual system modelling software.
- Direct CAD/CAM, ODB++ and PDF output.
- Over 35 k schematics & PCB library parts.
- Mixed mode SPICE simulation engine.
- Co-Simulation of 8051, AVR, PIC, ARM, PICCOLO, MSP 430, Arduino AVR, etc.
- PCB module integrates auto Route/Placement, Power planes, 3D viewer, etc.

Educational Need:

- Embedded project & Regular Laboratory.
- Increases Students Employability.
- Research and Development.
- Faculty Development program.
- Multi disciplinary software.
- Enables re-use of blocks across multiple projects.

Industry Relevant:

- An Experimental Canvas for Design.
- Write Firmware for Virtual Hardware.
- Research and Development.
- Fewer Design Iterations.
- Enables Parallel Development.
- Reduced Development Time.
- Reduced Debugging/Testing Time.
- Reduced Manufacturing Delays.
- Reduced Equipment Costs.

Recover your faulty complex PCBs using Boundary Scan & VI tests

QT22

QSM VI & BOUNDARY SCAN TESTER

KEY FEATURES :

- Best Solution for today's high tech / high density boards with ASICs and no documentation.
- Analog Signature and Boundary Scan combination
- QSM Analog Signature using Learn and Compare Technique for Boards with documentation
- Automatic "Best fit Curve" for QSM VI Signature Analysis for increased fault coverage
- IEEE Standard 1149.1 Compatible Boundary Scan Test technique.
- Boundary Scan Auto learn feature to create net list for boards with no documentation.
- Learn & compare facility for both QSM VI and Boundary Scan
- UUT Interface through Manual Probe / Clips and XYZ Multi Test Head Probers
- USB Interface port for PC / Laptop and with Test Director 6 (TD6) Test Software Package.
