let the user document the work. Another very useful feature of 5Spice is its extensive task-oriented *Help* index that gives a detailed explanation of all functions and procedures. This makes

the software simple even for beginners. There is no limit in the number of analyses (along with its corresponding graph) that can be defined, named and saved using this tool.

Analyses

This tool can be used to check DC bias (DC-operating point). It permits non-linear DC, transient, harmonic distortion, DC sensitivity and FFT analyses. Linearised analyses like AC, noise analysis and AC sensitivity analysis can also be done on the circuits.

Distortion, noise, sensitivity and FFT analyses are available only for registered users.

Licence and registration

5Spice is a copyrighted program authored and published by Richard Andersen. It can be used free of charge for non-commercial purpose. For commercial use, the software is provided with a 30-day evaluation period, after which it should be registered. The registration licences 5Spice for commercial use, expands its set of features and offers other added benefits to the user.

System requirements

Operating system. Windows 8, Windows 7, Windows Vista and Windows XP. The program also runs in Windows on Apple computers (with Intel processors). Not suited for Windows emulators or Windows running on top of Linux.

Screen resolution. Minimum recommended resolution is 800×600.

Installation

The setup file *5SpiceAnalysis210.exe* is 6.95MB. Double click on the file and the installation wizard assists you to get the program installed. The WinSpice included with the package is self-installing.

The main goal of the program is the design and analysis of analogue circuits at the component level.

Working with 5Spice

The main window of 5Spice Analysis 2.10 is shown in Fig. 1. Here you can start designing the circuits. A title block can be found on the bottom right of the main window. Double click on it (or right click on it and select *Edit Parameters*) in order to add or edit the details of the Title.
