

# Electronic Projects and Circuits

Here are some websites that would be a useful resource for hobbyists and budding engineers alike

## electronics-lab.com

On this website you can find useful circuits with full description, diagrams and PCBs, electronics related articles, links and downloads. The site has approximately 75,000 posts on 8500 topics in three different categories. The project section has 198 projects listed on various topics. The site also has a forum where you can discuss these projects.

<http://electronicsproject.org>

## electronicsproject.org

This site has a good collection of electronics projects from the basic to advanced level. It also has tutorials and circuit ideas. The site features simple alarm projects as well as advanced microprocessor- and microcontroller-based projects.

## electronicsforu.com

This portal serves as a storehouse of information for the electronics industry. It features the latest news, information about new products, and a Web search option covering not less than 50,000 electronics websites. It also includes the hugely popular EFY tested circuits, reproduced from Electronics For You magazine.

<http://electroschematics.com>

## electroschematics.com

electroschematics.com discusses electronic circuit schematics, printed circuit board diagrams and electronic project diagrams. The website has a huge collection of electronic circuit schematics, spanning audio amplifiers, radio and IR transmitters, antennae, DIY kits and more. It has a total of 1062 electronic projects and circuits.

## eeweb.com

Joe Wolin and Cody Miller formed Aspen Labs, LLC in 2007 with the goal of creating a business media company that focuses on the needs of engineers. In 2010, they partnered with Digi-Key Corporation and launched EEWeb—an electrical engineering community for hardware designers. Apart from several sections on the site, there is a dedicated section on electronic projects. This section has a good collection of projects that engineers would love to try.
