

XBee® 865 for India

865-867 MHz Radio Module for Utility Meters and Industrial Applications

The **XBee 865LP** is an 865 MHz RF module for India. It is a high-performance, low-power module available at an extremely competitive price point. The XBee 865LP RF module runs either a proprietary DigiMesh® or point-to-multipoint networking protocol, utilizing an Analog Devices ADF7023 transceiver, which offers industry-leading interference blocking. The XBee 865LP can also operate between 863 MHz and 870 MHz offering flexibility for deployment in several regions outside of India.

- Up to 4KM range over 10 channels
- LBT + AFA (listen before talk and adaptive frequency agility)
- Transparent and programmable options
- Ultra low power to support battery powered applications
- Serial, analog and digital I/Os
- Over-the-air firmware upgradable
- Remote management using Device Cloud by Etherios
