

Technology You Can Trust

Avago Technologies RF and Microwave Products

Low Noise Amplifiers

Gain Blocks and Amplifiers

Integrated Modules

FBAR Filters, Duplexers, and Multiplexers

RF Diodes and FETs/Transistors

Avago Technologies offers a broad portfolio of RF and Microwave components for handset, wireless infrastructure, WiMAX/WiFi, GPS, military, test and measurement, and point-to-point applications.

- LNA solutions with industry's lowest noise figure to improve base station receiver sensitivity
- Gain blocks and amplifiers that reduce power usage
- Integrated modules reduce parts count, board space, design time, and cost
- FBAR filters deliver industry's best adjacent band rejection and solve coexistence problems
- RF diodes and FETs/transistors for most RF applications
