Now Tag and Get Tagged on Instagram

Gone are the days of selfies on your Instagram profile as the photosharing app will now showcase all your group photos you're tagged in on your profile and will also let you tag your friends in pictures.

The newly launched Instagram feature called 'Photos of You' was released for its iOS and Android apps today. With its functionality exactly like the photo tagging feature of Facebook, Instagram users will now be able to tag pictures with any other Instagram account.

Hotmail is Officially Dead

Hotmail is now a thing of the past. Microsoft has successfully migrated over 300 million active Hotmail users to the Outlook.com email services. This huge shift resulted into raising the total Outlook.com users to 400 million, which is a milestone for the email service provider.

A blogpost by the company reads, "Today, we're excited to announce that we've completed upgrading all Hotmail customers to Outlook.com."

Samsung Galaxy S4 Gets Software Update

Samsung has rolled out its first (over-the-air) update for its latest Galaxy flagship smartphone, S4.

Well, we won't like to keep you in suspense on that and tell you, this is just a minor software update that the company has released for the Galaxy S4, which typically takes care of bug fixes and offers stability improvements (if there are any).

Toshiba's Tegra 4-Powered Tablet

Toshiba is reportedly readying the first-ever NVIDIA Tegra 4-powered tablet that will be launched in the coming months. Folks at Techblog have managed to get their hands on a device that could be around 25.6 cm (10-inch) in size.

Interestingly, this tablet, dubbed as AT10LE-A appears to come with a specially designed docking port.

Wireless Speaker System

Creative T3150 offers enhanced audio performance and seamless wireless streaming at a great price

Creative Technology has announced the new Creative T3150 Wireless 2.1 speaker system with Bluetooth wireless technology.

Compatible with most mobile phones and laptops that feature Bluetooth stereo profile, the Creative T3150 Wireless speaker system offers wireless connectivity in addition to wired connection. It comes with a wired remote control that powers on/off and adjusts volume for ease of use.

According to the company, the superb audio performance of the Creative T3150 Wireless speaker system is achieved by a stringent and optimised component selection process, precision tuning, as well as Creative's innovative design methodology that features

the Creative IFP (image focusing plate) within the compactly-designed satellite speakers. The Creative IFP enables the satellites to deliver a wide acoustic sweet spot with a much improved sonic directivity to the listening area, giving music more focus while preserving tonal accuracy. A custom-tuned, down-firing subwoofer ensures a delightful music listening experience.

3G-Enabled Dual Core Tablet

Intex's i-Buddy Connect 3G is an infotainment tablet with video conferencing and voice calling features

Intex Technologies has launched its first 3G-enabled dual core tablet i-Buddy Connect 3G. The 17.8cm (7-inch) dual SIM tablet provides speedy connectivity while video conferencing and browsing through Internet and is preloaded with EducClass—a smart school application with curriculum for K12.

The device supports 5-point touch capabilities. It runs on Android 4.0.4 Ice Cream Sandwich and sports 4GB internal memory that is expandable up to 32 GB. Powered by 1GHz dual core processor, the device comes with 1GB RAM.

The tablet is capable of making hi-speed and smoother video calls with dual camera support, having 3.2MP camera at rear along with 1.3MP front camera. To power up

the device, it is endowed with 3500mAh lithium-ion battery, providing a talktime of 3 hrs and stand by up to 300 hrs.

For enhanced connectivity, the device offers HDMI support to connect it with any of the television devices. Moreover, built-in Bluetooth ensures smoother data transfer among various Bluetooth enabled devices.
