based and users have to insert a SIM card in it. The phone has been priced at ₹ 1000.

Commenting on the release, Ravi Babu, general manager of BSNL's Tirupati Telecom District said, "This way, one can convert the existing mobile number to a FWL phone, enjoy all the benefits associated with mobile tariff plans and talk as long as required without attracting the ill-effects of radiation."

Galaxy S4 to be manufactured in India soon: Report

Korean company Samsung has announced plans to soon begin manufacturing of its recently launched Galaxy S4 smartphone in India. However, there is no specific time-frame defined by the company as to when the production will start at its facility.

"We are planning to start manufacturing of S4 soon at our Noida facility," PTI quoted Vineet Taneja, country head of Samsung Mobile and Digital Imaging as saying. The Noida facility is reportedly manufacturing about 35-40 million phones annually. These include 12 smartphones such as Galaxy S3.

Japanese company to launch solar products in India

Mitsuki Corporation Ltd, a noted Japanese company, has set its eye on entering the Indian market by introducing its range of solar-powered products. The company, which is part of the UAE-based Legend Group, will launch solar water heater, heat pump, solar inverter, solar lights, security cameras and other home security products in the country over the next couple of months.

"Apart from our research and development wing in Japan, we have three design and production bases in Malaysia, Taiwan and China. However, we are planning to invest ₹ 3 billion to set up a production facility in Pune," said Joji Mathew, managing director of Mitsuki was quoted as saying.

Initially, the company will sell the products manufactured in its Chinese and Malaysian plants. "At a later stage we will shift to the products from the Pune plant," he added.
