

The NUC123 series features 72MHz high speed and supports 32-bit multiplier, structure NVIC (nested vector interrupt control), dual-channel APB and PDMA (peripheral direct memory access) with CRC function.

In addition, the NUC123 series is equipped with Flash memory ranging from 36 kB to 68 kB, SRAM from 12 kB to 20 kB, 8-channel 10-bit ADC, high-performance communications peripherals, such as UART, SPI, I2C, I2S USB 2.0 FS devices, and offers low-voltage reset and brown-out detection, PWM (pulse-width modulation), capture and compare features, four sets of 32-bit timers, and internal RC oscillator, etc.

Mid-power UV package products

SemiLEDs has launched two new mid-power UV package products to add to its

expanding UV package products portfolio. The new products are P50N-UT 0.5W UV package and P50N-US 0.2W UV package.

With the addition of these two new products, SemiLEDs is extending its lead as the provider of the world's broadest UV package portfolio.

Both of these packages are for sale anywhere in the globe and they are especially suited for consumer applications such as nail gel curing.

TOOLS & EQUIPMENT

Fuel saving device

Advance Technologies has introduced 'Fuel Max' gas saver, a device which

saves usage of

fuels like natural gas, LPG and CNG.

When clamped on the fuel line, the fuel flows through Fuel Max helping it to burn faster and more efficiently. This leads to an increase in the fuel efficiency between 20-40 per cent. Once installed, it doesn't require any maintenance.

The innovative feature of Fuel Max is that it comes in physical contact with the circuitry of powerful rare Earth magnets. It holds the magnets in such a sequence which provides optimum performance.

Programmable electrical load driver

Perfect Electronics has launched a single/three-phase programmable electrical load driver. It is useful for various applications such as electrical single-phase water pump motor. It starts the motor automatically at the programmed 'on' time and stops at programmed 'off' time. A maximum of eight time durations can be programmed.

This product can also be used as a security system by connecting bulb at the output. The same system can be used to switch on and switch off streetlights automatically at fixed times. The products are available with output power capacities of 1 kW and 3 kW. Three-phase water pump motor driver is also available.

SUSPENSE

?

Are You In
Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!
