

Nokia Lumia 720

Launched recently in India, Lumia 720 is said to have the biggest battery (2000mAh) in the mid-range Lumia segment. Apart from that, it comes with a 10.9cm (4.3-inch) display and the same hardware as that of Lumia 520 and 620. The upgrade is in the camera department, where it sports a 6.7MP rear camera with Carl Zeiss lens and a 1.3MP front-facing camera. Lumia 720 is priced at ₹ 18,999.

Nokia Lumia 820

It is one of the first smartphones to be launched by Nokia during the launch of Windows Phone 8 last year. Back then it was priced quite high but now it is selling for under ₹ 25,000 in the country. This phone too comes with a 10.9cm display but 1.5GHz processor and 1GB RAM are a definite advantage over Lumia 620. The phone also has an 8MP rear camera and an HD front-facing snapper.

Nokia Lumia 920

The best of the lot is Lumia 920. The company has given its all (campaigns, TV ads, demos, etc) to promote the phone. This phone comes with an 11.4cm (4.5-inch) display, and is powered by a 1.5GHz processor with 1GB RAM. But the biggest selling point of the phone is its camera. It comes with an 8.7MP camera with Carl Zeiss lens and an HD front camera. Priced at ₹ 35,999, the phone is on the higher end side but, as per the company, it has found plenty of takers.
