

Technology You Can Trust

Avago Technologies. 45 Years of Innovation Brings Your Imagination to Life.

Our technology is part of your every day life.

From the smartphone that keeps you in touch, the fiber optic network that keeps us connected, to vehicles that explore other planets, Avago provides the components that sense, illuminate, and connect digital data for an ever-increasing array of sophisticated device technologies.

With a heritage of technical innovation dating back 45 years, Avago Technologies is a leading supplier of analog, mixed signal and optoelectronics interface components that serve three diverse end markets: wireless communication, wired infrastructure, industrial and automotive electronics.

Avago Technologies – a technology partner paving the way for the smarter, brighter and better connected systems of the future.
