

High Performance , High Reliability Ultra-compact Renesas IGBT

Features and advantages

- Trench Gate and Thin Wafer Technology
- High Efficiency - Ultra low VCE(sat)
Typ 1.35V (RJH60F series)
- Ultra high speed switching - 60ns
(RJH608 series)
- High reliability - Tsc of 5, 6, 8 and 10 (rated)
available (RJH60D/V/M and RJH65S series)
- Low collector emitter leakage current
- High Operating Junction Temperature -
Tj max @ 175C guaranteed
- Wide range of voltage ratings - 600V, 650V,
1100V, 1200V & 1350V

- Reverse conducting series (voltage
resonance use) available
- Extensive line-up with build-in FRD (RJH
Series) and without FRD (RJP series)
- Multiple package options available -
TO-3P, TO-247, TO-220, TO-220F, D2PAK,
LDBPAK, TO-252

Applications

- Inverter, Power Supply Circuit,
Solar Power, IH-Cooker, Display
etc.
