

Clean, Protect, Lubricate

Electrolube's wide range of high performance chemicals are used extensively by international electronics and manufacturing industries.

Electrolube products are specified and widely used for the manufacture and maintenance of electrical and electronic components and assemblies in various markets including automotive, aerospace, marine, medical, industrial and consumer electronics.

Conformal Coatings

DCA – SCC3 Conformal Coating

UL approved protection for PCB's from Chemicals & Solvents.

APL – Acrylic Protective Lacquer

Excellent temperature range and UV traceable.

Contact Lubricants

Specially formulated greases and oils that reduce friction and enhance the electrical performance of current carrying metal interfaces found in switches and connectors.

CG60 – Offers enhanced electrical and mechanical properties under the conditions required by today's automotive and domestic equipment industries.

LGC – Low current grease developed to offer enhanced electrical performance for low current switches as well as offering desirable mechanical properties.

SPG – Special plastics grease is a synthetic grease offering outstanding low temperature performance and excellent compatibility, even at elevated temperatures.

Thermal Management

HTSP: Ultimate Thermal Conductive Paste

Providing 3W/m.K and temp range of -50 to 200 °C.

TCOR – Thermally Conductive Oxime RTV

A single part RTV which provides a high degree of thermal conductivity.
