cruited close to 700 fresh engineering graduates passing out of universities in the year 2013," informs Garadi. He says, "Almost all of them would be engaged in engineering activities—some involved in hardware design, some in the software design and the rest engaged in the mechanical design activities. There are also some engineers involved in relatively new but rapidly growing area—mobile apps development."

When fresh engineers come on board, they may operate as junior development engineers undergoing intensive training—the first month being spent on induction training when they get exposed to a common set of topics, especially dealing with automobiles and the engineering processes and procedures.

Subsequently, they are assigned to different areas where they undergo on-the-job training for a few months in

entry-level engineering tasks under the tutelage of senior engineers; each getting exposed to one specific area within the automotive technologies such as power-train, body electronics, active and passive safety and infotainment.

Demand areas

Due to the nature of the work, most jobs are concentrated in the auto manufacturing hubs of Delhi, NCR and Chennai. While core engineering skills

Micro Controlled Intelligent UPS

ONLINE UPS
1 KVA to 100 KVA
Latest State-of-art PWM Controlled
Double Conversion, Pure Sinewave
High Efficiency & Reliability
IGBT Based Design
5 Years Warranty

OTHER PRODUCTS

Line Interactive / Offline UPS
500VA to 3 KVA

Home UPS
300VA to 3 KVA

Sine-wave Inverter
300VA to 50 KVA

Servo Voltage Stabilizer
2 KVA to 500 KVA

Scaled Maintenance Free (SMF) Batteries

Battery Charger (SMPS)
