

Android-powered Phone

Karbonn's Titanium S5 is powered by a quad-core processor and runs Android 4.1 version

Karbonn launched its Titanium series with an aim of delivering high-end mobile phones at mid-range in India and the latest phone in this series is Titanium S5.

Titanium S5 is a 12.7cm (5-inch) IPS display screen phone with dual SIM. It runs on the latest Android Jelly Bean 4.1 OS and powered by 1.2GHz quad-core processor. This phone is said to give a tough competition to Micromax's Canvas HD and Xolo Q800 on account of its affordability and power-packed features.

The phone supports connectivity options such as Wi-Fi, Bluetooth, 3G and GPS and also features a USB port. Titanium S5 flaunts an 8MP camera with Autofocus and LED flash, and it also bears a front-facing camera of 2 MP enabling the user to make video calling.

Karbonn's Titanium S5 is also said to offer higher multimedia decoding and gaming abilities.

Camera with 50x Zoom Lens

Fujifilm SL1000 offers 50x optical zoom and powerful optical image stabilisation

Does changing the lenses of your DSLR create hassles for you? Or the dust on the sensor often makes you anxious? Breathe easy, Fujifilm India has launched its latest SL1000 camera that will rid you of these hassles, yet give you the best shot.

With a 50x zoom lens, the latest powerful all-encompassing camera from Fujifilm offers a shooting range of 1cm super macro to a huge 1200mm extreme telephoto.

Not only can you take superb shots by it but also record movies in full HD with its advanced filter and 3D shooting features.

Adding to powerful close-up capacity is the fact that its zoom doesn't stop at a 1200mm range.

Rather, with intelligent digital zoom, the focal length is effectively doubled to 2400 mm or an incredible 100x which give absolutely stunning results.
