Easy Traffic Mobile App

Kochi-based AmidRay Technologies has started a community Android app, which will help you avoid jammed roads. The application is gaining fame as India's first easy traffic mobile application.

The application will work on the basis of inputs taken from the community members. Any person can become a member simply by downloading the app.

Google Glass to Adopt Social Networking

With Google Glass Explorer edition about to reach developers who pre-ordered it, reports are coming that the public version of Google Glass will have the necessary support from the likes of Twitter, Evernote, Path and many more.

Amazon Slashes Price of 32GB Kindle Fire HD Tablet

Amazon, the renowned Kindle e-reader and Kindle Fire tablet maker, has slashed the price of its 32GB Kindle Fire tablet variant. The US-based company has not had a good time with its 32GB tablet variant in terms of sales, which could have prompted Amazon to exercise price-cutting strategy for the slate. The revised price of the tablet, which was originally priced at \$249, is \$229.

Viber Launches VoIP for BlackBerry

No voice calling on the free calling app 'Viber' for BlackBerry is now a thing of past. Viber has kept its promise and launched the VoIP (voice-over Internet protocol) for the BlackBerry users.

With its latest software updates in version 2.4 the Viber app has launched voice calling feature for BlackBerry OS 5 and OS 7; unfortunately OS 6 doesn't support this feature.

Touch Screen Inspiron Range of Laptops

The new Inspiron 14R and 15R feature a new sleek design and enhanced multimedia capabilities

Dell has announced new additions to the Inspiron laptop portfolio—14R and 15R—targeted at Gen Y consumers. Packed with new looks and style, these new products are available in a thinner form factor and are optimised for delivering better performance with an improved battery life, according to the company.

Besides improved battery life in a smaller and lighter package, the new devices are available with i3, i5 and i7 processor options

to suit the diverse requirements of the users—be it multi-tasking at work or having fun with multimedia.

The new products feature improved battery life achieved by combining battery with Intel's ultra-low voltage processors which require only 17 W to run.

Compared to previous generation models, these new Inspirons are around 2.54cm thin, which is 17 per cent thinner and 15 per cent lighter than previous models, meaning easy portability.
