

The entire terminal will now be enabled with Tikona Digital Networks (TDN)-secured wireless broadband Wi-Fi connectivity. This basically means that commuters from surrounding states can browse at the terminus with high-speed Wi-Fi free of charge for the first 30 minutes.

MIRTEC becomes Bosch's exclusive AOI partner

MIRTEC has been chosen as the exclusive AOI partner of Bosch for the next five years. The agreement was inked on March 20, 2013, revealed MIRTEC. The multi-million-dollar pact states that Bosch gave MIRTEC an exclusive supplier contract for multiple MV-9 2D/3D AOI systems.

According to a press statement, Markus Jung, corporate lead buyer for machinery and equipment of the Bosch Group, said, "We are very pleased to enter this new partnership with MIRTEC in the field of automated optical inspection. The combination of 2D/3D technology will help us to further develop our high-quality standards for the future. With MIRTEC, we have a strong and dedicated partner who shares many of our values and understandings."

ABB to invest \$100 million in Indian electronics manufacturing

ABB has committed to maintaining its \$100 million a year investment despite recent reports that highlight an overall decline in the Indian electronics manufacturing market.

The multinational corporation that operates in robotics and mainly in the power and automation technology areas, has said it is waiting for the turnaround in the Indian market and consequently will keep its \$100 million a year investment in India going.
