

PCB Design Software

Can you please tell me the name of the PCB design software used in EFY projects?

Srinivasa Devi Reddy

Through e-mail

EFY: We are using gEDA project software for designing printed circuit boards (PCBs) and schematics. gEDA project runs on Linux platform and is one of the most matured EDA tools that supports complete electronics design cycle, including schematic capture, attribute management, bill-of-materials (BOM) generation, netlist generation, analogue and digital simulation, and PCB layout.

Guitar and Microphone Amplifier

In the 'Guitar and Microphone Amplifier Using TDA2005M' circuit published in EFY May 2012 issue, is it really necessary to use capacitors C8, C9 and C1? Can the positions of R2 and C2 be interchanged? Why didn't you bias preamplifier T1 to use 14.4V instead of 10V?

Krishna

Through 'electronicsforu.com/Circuits/The author Petre Tzv Petrov replies:

Yes, C8 and C9 are really helpful when you have long wires between the power supply and the board with the amplifier. They are helpful when you are using an unregulated wall adaptor with a small filtering capacitor. You can reduce the values of C8 and C9 to

around 470µF, 25V if you have good power supply and capacitors of good quality. Although the circuit may work without C8 and C9 in most cases, it will not be stable. C1 is needed to filter the power supply of the preamplifier. Preferably, R2 and C2 should not be interchanged.

The 10V regulated output is used because the preamplifier needs well-filtered and stable power supply in order to perform properly. This reduces noise and also prevents the motor boating effect. The power amplifier can be powered by a not-so-well-regulated filtered power supply and yet perform satisfactorily.

EFY Editorial Guidelines

I am a PG student in electronics stream and wish to get my project idea published in EFY. Please tell me the paper size, font size, number of columns, etc for publishing.

Ritika Raj

Through e-mail

EFY: You can refer to the editorial guidelines available at the following link:

<http://efymag.com/WI-EDT.pdf>

EFY Source Code Download

We are assembling the 'Smart Solar Charger' construction project published in January issue. We need the program source code used in this project.

Abinaya Srinu

Periyar Maniammai University,

Thanjavur

□ I have a plain copy (without EFY DVD) of EFY March issue. Please tell me from where can I get the source code of the '31-Channel RF Remote Control' construction project published in this issue.

Hardik Suthar

Gujarat

EFY: You can download the codes from www.efymag.com website for free.

'Spot An Error' Award Winners

In 'Op-amp IC Tester' circuit idea published in April issue, the source supply connector is missing.

Sumanta Sarkar

□ In the above circuit, on page 101, point 2 should be "toggle up switch S2" instead of "toggle up switch S1."

Rabindra Nath Biswas

From Facebook: EFY's Electronics Design Community

For the last few months, EFY has been publishing circuit diagrams with test points and providing a table of test point voltages/signals in the text. It is a useful improvement—keep it up! But I feel test points should be explained more extensively to help the readers understand them better.

Vivek Ghosh

Spot an Error

And WIN Award!

You can win one thousand rupees plus a certificate from the editor of Electronics For You magazine if you spot and report any factual error in the latest issue of the magazine. Your report will be published in a coming issue of the magazine, giving credit to you.

Though every care is taken in preparation of the content for the magazine, an error can slip in at times. So we invite our learned readers to point out any error that they spot, for the benefit of the other readers.

Rules:

- The error has to be reported before end of the month that is mentioned on cover of the magazine
- The report has to be sent in writing or by email addressed to the Editor, EFY Magazine (editsec@efyindia.com)
- The error should be of factual nature, in the information published in the magazine, and not a grammatical or syntax error
- The correct information should also be provided along with the error spotted by you
- In case more than one person reports the same error, the one whose report reaches us the earliest will get the award money
- In case two or more persons jointly report an error, the award money will be divided amongst them
- EFY employees, their family members and friends, and EFY associates and their family members and friends are not eligible
- Decision of the editor will be final in this matter
