The Park Hotel

IDAS 2013 focuses on indigenization which is considered the key to self-reliance, without compromising national security, in the Indian Aerospace and Defense industry. Attend this event to learn how COTS technology and software defined systems help leverage the local talent to build state-of-the-art test & embedded systems for Indian aerospace-defense needs.

Technical Sessions and Demos on:

- Platforms for RADAR Test and Validation
- Scalable Architectures for Spectrum Monitoring
- Wireless Sensors and Applications
- Versatile Record and Playback Systems
- RF Hardware-in-Loop for Design Validation
- Autonomous Systems
