

High Temperature, High Speed, High CMR Photocoupler for IGBT Gate Drivers of Inverter Circuits

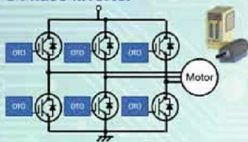

Renesas photocoupler for IGBT Gate Driver is developed with optimum high temperature, high speed and high CMR suited for applications in solar and wind power generation, home appliances, FA equipment etc

Features

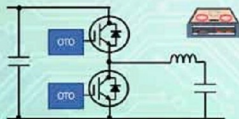

- High isolation voltage: VISO = 5kVr.m.s.(min)
- High operating temperature: TA = 110°C (max)
- High switching speed
 - PS9305/PS9308/PS9505/PS9402: tPLH/tPHL = 250ns(max)
 - PS9306/9506: tPLH/tPHL = 400ns(max)
- Low consumption: ICCH/ICCL = 2 to 3mA(max)
- High CMR: CMH/CML = 25kV/μs(min)
- PS9402 offers DESAT (Load short-circuit detection), active miller clamp function (to contribute to the reduction of parts in a model).

Applications

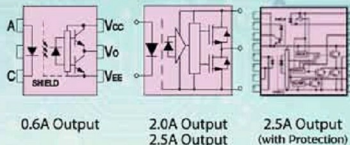

3 Phase inverter

IH cooking heater

Inverter Block Diagram

Products

Package Information

PS93xx
6pin-SDIP

PS95xx
8pin-DIP

PS9402
16pin-SOP

Product	Output
PS9305, PS9505	2.5A Output
PS9308	2.0A Output
PS9306, PS9506	0.6A Output
PS9402	2.5A Output
