

Ultra Low Power Digital Optocouplers in Industrial Communication Interfaces

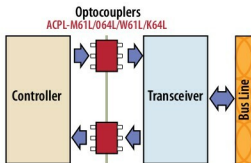

Key Features

- Ultra low power
- Wide temperature and supply voltage range
- High noise immunity (up to 35 kV/ μ s dynamic and static common mode rejection)
- Certified for safe insulation (up to 1140 V_{peak} continuous working voltage)

90% less power than standard optocouplers
40% lower power than alternative digital isolators

Avago Technologies new generation optocouplers, ACPL-x6xL series offer significant power efficiency improvements for industrial communication interfaces. With 35 years of experience in digital optocoupler design, Avago delivers quality you can count on.
