

An Innovative Street Light Solution for the India Market

www.ti.com/led

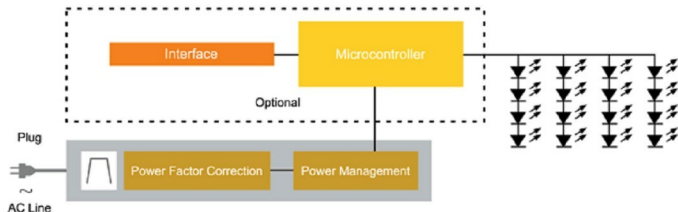

Check out a cooler, intelligent street light LED lighting solution that provides the greatest power efficiency, power factor correction, for India specific universal input voltage range and the flexibility to control multiple strings.

Key Solution Features:

- Lighting power controllers for low to medium power lumens applications
- 4-channel high voltage current regulator that provides a simple solution for LED lighting applications
- LED controller designed for use in higher power LED lighting systems

Street Light Solution
