

have strong nippers for perfect trimming of wires and leads. There are also heavy-duty compound-action snips available that can be used to cut stuff like

general-purpose PCBs. A diagonal cutter and a heavy-duty compound-action snip make a good combination.

Wire stripper. A simple manual wire stripper is a pair of opposing blades with a notch in the middle that

quick stripping of wires but you don't really need one. Multi-gauge stripper is good enough in almost all the cases.

Screwdriver set. Look for a good-quality multi-purpose screwdriver set with complete set of extension bits.

Trust me you will need all of them at some point or the other.

Crimping tools. A crimping tool is a tool designed to connect a connector

to the end of a cable. There are different types of crimping tools for different types of connectors. For example, for network cables there is an RJ45 crimping tool that crimps the network cable to RJ45 connector. In a toolkit, look for one of those universal crimping tools that can crimp more than one type of connectors.

IC extractor. IC extraction tool is highly useful while de-soldering SMD

makes it easier to remove the insulation without cutting the core of the wire. Such clippers don't give you good results as you would need different notch sizes for different wires. There are good-quality multi-gauge strippers available that have different notches for different AWG.

There are also automatic wire strippers that simultaneously grip the wire from one side and cut and remove the insulation from the other. These allow very

chips with packages like SOIC, quad and PLCC. This tool helps in neat and clean de-soldering by lifting the IC once the solder melts.

Prototyping tools

Some toolkits also include prototyping tools like breadboard, solid-core wire roll, alligator clips and connectors. It is good to have all

Megger.

Test and Measurement Instruments at

Prices like

never before...

Steal The Deal!!

MIT230

SPECIAL PRICE
16,800/-

- 1kv Insulation tester upto to 1000 MΩ & Continuity testing at 200 mA down to 0.01 Ω
- CAT III 600V & IP40 rated

MIT410

SPECIAL PRICE
24,800/-

- Diagnostic insulation tester upto 1000V with Polarization Index, Dielectric Absorption ratio measurement and multimeter function
- Test voltages 50 V, 100 V, 250 V, 500 V, 1000 V P/DAR, Insulation Resistance range upto 100GΩ
- CAT IV 600V & IP54 rated

DLRO10HD

SPECIAL PRICE
1,60,000/-

- 10 Amp Digital Low resistance Ohmmeter Bidirectional, Unidirectional, Automatic, Continuous & Inductive Modes
- CAT III 300V & IP65 rated

Hurry! Offer valid till stock ends
