

A budget smartphone from Celkon

The dual-sim Celkon Campus A15 smartphone supports 2G connectivity

A new Celkon Mobiles' smartphone has been launched in India. The Android-powered device, dubbed the Celkon Campus A15, has been priced at ₹ 3999 by the domestic smartphone maker and is currently available at all major retail stores in the country.

As is evident from the price, the Celkon Campus A15 is an entry-level smartphone, which runs the Android 4.2.2 operating system and is powered by a 1GHz dual-core processor along with a 1400mAh battery. It has an 8.9cm (3.5-inch) HVGA screen along with a 3.2MP rear camera. The smartphone supports 2G connectivity and can house two SIM cards. Further, the device has 256 MB of RAM and 512 MB of internal storage space. This is extendable using a micro-SD card. The smartphone also features Wi-Fi, a micro USB port and Bluetooth.

As an entry-level smartphone, the device packs in enough good features but coupling 256 MB of RAM alongside the Android 4.2 Jelly Bean operating system might cause a lot of problems for users. Nevertheless, because of its price, Celkon's newest device should do fairly well in the country.

Price: ₹ 3999

Surround sound gaming with multimedia headphones

Zebronics' new gaming headphones are designed to provide amazing audio quality for varied uses

Infotronics, a leading supplier of products and accessories that it sells under the brand Zebronics, has introduced four new gaming headphones – the Zebronics Iron Head, Colt, Rattlesnake and Stingray. This series comes with volume control, a mute button, microphone on/off and an in-built microphone.

Designed to look and feel like headsets worn by gamers, the Zebronics Iron Head is the star of the new line. A battle-ready solution, the first from Zebronics to incorporate 7.1-channel simulated sound effects for powerful, immersive PC gaming audio, it delivers superior sound isolation. The soft ear pads are foam cushions that take the shape of your ears for maximum

comfort over extended use.

Dedicated microphone and volume controls are conveniently close at hand even when using a PC or notebook for gaming, enabling quick use rather than having to fiddle with software settings. It is easily connected via USB, has a built-in sound processor and features

a 3m-long cable. The 7.1-channel simulated sound effect technology makes it the most vital component of your total PC gaming and movie experience. Its excellent all-round performance makes it ideal for discerning music lovers and movie enthusiasts too, since it blocks out the loud noises made by traffic, construction work or any other ambient sounds.

Price: ₹ 1799 (Iron Head), ₹ 999 (Rattlesnake), ₹ 349 (Colt), ₹ 499 (Stingray)

A new-age game controller: The iMotion 3D

The controller provides haptic feedback to players

A new form of gaming controller, which allows players haptic feedback, has been unveiled. Dubbed the iMotion 3D, this controller is capable of working with any game that has been designed for the Mac, iOS, Android, PC, Linux and Oculus Rift with controller support.

The new controller has airtouch haptic feedback, which creates a virtual touch-

screen in front of the player. The device has to be strapped to the user's hand. It provides physical feedback to the users, when a virtual object is touched within the game that is being played.

The project is currently in the concept stage and the company is trying to raise enough pledges on the Kickstarter website, to go into production. The concept not only works for games but also with TVs, etc.

Price: \$ 49 (starting price)
