

to executable by typing command:

```
# chmod 755 rssTTS.sh
```

Now you are all set to schedule the RSS text-to-speech program so that it can timely poll the various RSS URLs and read out the news to you through your radio.

To schedule the script, first type:

```
# crontab -e
```

Enter the line:

```
1,30 * * * * /root/rss-reader/rssTTS.
```

```
sh >>/root/rss-reader/rssRun.log
```

Press Ctrl+x to save and exit.

Restart 'cron' so that your settings take effect:

```
# /etc/init.d/cron restart
```

Your personal RSS- and Raspberry Pi-powered FM channel should be up and running now. Depending on the strength of FM transmission, you can even have your neighbours tune into

espeak -ven+f3 -k5 -s130 -a200 "Now let's hear top stories from another feed source"  
2>/dev/null; \  
sleep 1; \  
sleep 5; \  
done
```

Box 5

this handy news channel from the Internet.

Future possibilities

What we just did is a fairly straight and simple project to demonstrate the capabilities of Raspberry Pi with some small and handy utilities and scripting. However, the intent of this project was to showcase a possible use case to leverage Raspberry Pi and open your thoughts to explore more possibilities (not really dependent on RSS), like:

1. Having your emails read out to you when you are at home
2. Having your Facebook wall posts read out to you
3. Having your favourite Tweets read out to you
4. A possibility of a social/crowd radio where in local community folks post

stories, articles, jokes, content and based on popularity, the content is picked up and broadcast on a channel!

So set your imaginations on fire and explore the new possibilities! ●

DO-IT-YOURSELF

Are You In Suspense?

Are you wondering what happened to your order or payment, even after a fortnight? But did you mention your name and address clearly while sending payment, and what the payment was for?

We get several payments every month without adequate instructions or even identity of the person sending the payment. As a result we are unable to take appropriate action on these, till we get a complaint - if at all.

At EFY, we want you to be our satisfied customer. So please do let us know in case your payment or instructions are not even acknowledged within a fortnight. We are not that lazy!
