

Learning Robotics

With the kind of automation being done in every field, robots have become more commonplace. This month we have featured a few online resources that will help you learn more about robots

spectrum.ieee.org

IEEE Spectrum magazine is the flagship publication of the IEEE, the world's largest professional technology association. It is a monthly magazine for technology innovators, business leaders and the intellectually curious. Spectrum explores future technology trends and the impact of those trends on society and business. This website has a section on robotics. The content in this section has been divided into categories such as DIY robots, artificial intelligence, home robots, humanoid robots, robotics software, industrial robots, medical robots and military & space robots. The site can be used for reference or for fans of robotics to learn about new ideas.

robotics.jpl.nasa.gov

On the JPL Robotics website, you'll find detailed descriptions of the activities of the mobility and robotic systems section, as well as related robotics efforts around the Jet Propulsion Laboratory. The mobility and robotic systems section is incorporating its technology into a number of applications in space missions and related terrestrial endeavours. On the site you can read and learn more about these application areas and other ongoing activities.

nptel.iitm.ac.in

NPTEL or National Programme on Technology Enhanced Learning is a joint initiative of the IITs and IISc. NPTEL provides e-learning through online Web and video courses in the field of engineering. The site also has video tutorials on robotics. You can find videos on topics such as trajectory planning, velocity analysis, image processing, robot dynamics and control. There are several videos on futuristic topics too.

robotshop.com

RobotShop is the world's leading robot store for personal and professional robot technology. Here you will find the best selection of personal, professional, educational and toy robots. The site has a section called GoRobotics, which is the ultimate destination for those wanting to learn about robotics. You can get busy learning how to make robots with the available educational content. You can browse the website and learn how to build simple or complex robots.
