

Compulsory registration deadline extended

Manufacturers and importers of electronics products have heaved a collective sigh of relief as the Department of Electronics and IT (DeitY) has given companies three months more to get the compulsory government clearance to sell electronic goods. The government has extended the dead-

line for electronics manufacturers to submit their products to the Bureau of Indian Standards (BIS) for certification to January 3, 2014.

This comes as good news to the firms that would otherwise have not been able to import or sell products during the festive season. However, the industry speculates that the January 3 deadline will be further extended, in case general elections are announced earlier.

Government may impose 17.5 per cent duty on wireless equipment

In order to promote domestic manufacturing of information technology (IT) products and cut down the dependency of India on import, the government may soon start imposing customs duty up to 17.5 per cent. This will be imposed on certain wireless telecommunication equipment that are used for third- and fourth-generation mobile networks.

India is a signatory to the first Information Technology Agreement (ITA-1) under the World Trade Organisation, under which customs duty

was abolished on many technology products, reported *Live Mint*. The finance ministry has, however, said that the government feels that certain telecommunication equipment were not a part of the agreement and duty can be imposed on these.

India receives status of 'authorising nation'

India has received the status of 'authorising nation' under the international common criteria recognition arrange-

ment. Now onwards, the country can test electronics and IT products accepted globally and issue globally-valid certificates with regard to cyber security. The Ministry of Communications and IT stated in a release that the status will allow India to test IT and electronics products, and issue certificates that will be accepted throughout the globe.

India is the 17th nation to earn this recognition, as per the release. Till date, India had the status of 'consuming nation' with regard to certification
