ECIL records highest ever turnover of ₹ 17.29 bn

The Electronics Corporation of India Limited (ECIL), which is a public sector enterprise that falls under the Department of Atomic Energy, has witnessed the highest ever turnover. It has recorded an all time high of ₹ 17.29 billion during the financial year 2012-13.

India unveils its national solar map

A National Solar Map has been published by the solar industry consultancy, Bridge to India. It shows the installed capacity of states, market shares and trends from project sizes, tariffs, policies and market predictions. The information has been taken from analysts, industry insiders and various companies for an accurate illustration.

market revenue is supposed to grow at the CAGR of almost 12 per cent during the period 2013-18. The report states that major revenue of the Indian UPS market is garnered by three leading companies—Emerson, APC and Novateur.

The report points out that global players in the past few years have realised the opportunity in the Indian UPS market and, therefore, global giants have acquired many domestic UPS manufacturers.

US and India to work for greater cooperation in ICT, manufacturing

During the third bilateral summit between India and the US, held on September 27, 2013, when Prime Minister Manmohan Singh was on a visit to the US, a joint statement was issued which noted that the interests of the United States and India continue to converge, and this partnership will

indeed be a defining one for the 21st century. Along with other important issues covered in the statement, both the nations recognised the role and contribution of the Indian and the US information technology (IT) industry and the IT-enabled services industry in strengthening India-US trade and investment relations.

In this respect, both sides agreed to consider establishing a joint committee on investment in manufacturing.

Japanese companies to support setting up of medical electronics facilities

The Ministry of Economy, Trade and Industry, Japan (METI) convened the 'India-Japan business seminar on Medical Devices and Service' on September 11, 2013, in New Delhi along with Medical Excellence Japan (MEJ).

Kapil Sibal, minister for Communication and Information Technology of India, and Toshimitsu Motegi, minister of Economy, Trade and Industry, government of Japan, emphasised the importance of medical equipment in the existing scenario and the support needed from the government.

Motegi expressed that many Japanese countries are interested in the rapidly growing medical equipment industry in India.

MNRE issues second draft guidelines for NSM Phase 2

Reportedly, the Ministry of New and Renewable Energy (MNRE) has released the second draft of guidelines for Phase 2 of the nation's National Solar Mission (NSM).

As part of the guidelines, the body has set tentative dates for a request for selection (RFS) for 750 MW of solar photovoltaic (PV) projects to participate in the program, reported *SolarServer*.

The report suggests that the new phase will make use of the viability gap funding (VGF) mechanism, where developers will bid for the amount of VGF to receive, in addition to the sale of electricity at a standard tariff of ₹ 4.95 to 5.45 (US\$ 0.080-0.088) per kWh.
