DC-LINK Capacitors for Intermediate Circuit Applications

WIMA DC-LINK capacitors are designed for applications in high power technology. At high frequencies they show a higher current carrying capability compared to electrolytic capacitors. Further outstanding features are, e.g.:

- Very high volume/capacitance ratio
- High voltage rating per component
- Very low dissipation factor (ESR)
- Long life expectancy
- Excellent self-healing properties
- Reliable contact configuration

WIMA DC-LINK capacitors are available with capacitances from 2 through 4920 μ F and with rated voltages from 400 through 1600 VDC. Customized solutions can be realized on request.

Please contact SCI to get a free copy of the "DC-Link Capacitor" brochure by WIMA.
