

EFY TOP100

TOP 100 ELECTRONICS & IT COMPANIES IN INDIA

During 2012-13, the continuing fragility of the global economy, as well as domestic factors like the widening fiscal deficit and inflationary trends, depressed India's overall economic growth. The slowdown of the economy has been all-pervasive, affecting almost all sectors, including electronics and information technology (IT). According to industry pundits, these sectors may be able to recapture the growth momentum in 2013-14, on condition that the policy focus remains on the revival of domestic investment levels and on job creation.

According to the Department of Electronics and IT (DeiTY), the manufacturing turnover of the Indian electronics and IT-ITeS industry in 2012-13 is estimated to be ₹ 6930.36 billion, which is a 22 per cent growth over 2011-12 (with a turnover of ₹ 5678.35 billion, which represented a growth of 19.2 per cent over the previous year).

Although the number of loss-making companies are almost the same this year (16, compared to 17 last year), companies in all the sectors (electronics, IT and telecom) faced challenging market dynamics in 2012-13. Most companies just managed to sustain the momentum.

Among the telecom companies, while Bharti Airtel nosedived from the first position to third this year, Vodafone retained its fifth position. Bharat Sanchar Nigam Ltd (BSNL) and Reliance Communications also each moved one notch down—from No. 7 to No. 8, and from No. 14 to No. 15, respectively.

Among the IT companies, Tata Consultancy Services (TCS) was ranked No. 1 this year—up from second position last year. While Cognizant Technology Solutions climbed up from No. 3 to No. 2, Infosys Ltd rose from the No. 6 to No. 4 position this year. Wipro went down from No. 4 to No. 6.

The consumer electronics giants, on the other hand, did not register any significant growth this year. While Samsung and Sony's revenues went up, the turnovers of LG, Videocon and Panasonic went down. However, some electronics companies like Bosch, Haier, Toshiba, Dixon, NTL and Tata Power Solar have made their way up in the rankings this year.

Methodology. This list of Top 100 companies was compiled using revenue figures sourced directly from the companies or their balance sheets published on websites like the Bombay Stock Exchange. The consolidated revenue for the previous financial year was taken. As gross turnover may not be the ideal reflection of a company's performance, efforts have been made to provide profit/loss figures as well. For conversion purposes, we have taken \$1 = ₹ 65.71 as on August 31, 2013.

Disclaimer. While the EFY editorial team has taken the utmost care to contact all possible sources to make the rankings comprehensive, we may have inadvertently left out a few companies. Some revenues are our own estimation based on company news. We solicit suggestions to make this report even better in the coming years.

NEW ENTRANTS TO EFY'S TOP 100

- | | |
|---------------------------------------|---|
| 1. IBM India Pvt Ltd | 10. ITC Infotech India Ltd |
| 2. Bosch Ltd | 11. NTL Electronics India Ltd |
| 3. Karbonn Mobiles | 12. Tata Power Solar Systems Ltd |
| 4. Syntel Telecom Ltd | 13. Infinite Computer Solutions (India) Ltd |
| 5. Tata Technologies Ltd | |
| 6. Haier India | |
| 7. Toshiba India Pvt Ltd | |
