

Fig. 3: Generating EAN-13 and Code 39 barcodes

Software program

The program UPCEAN39.htm is coded in JavaScript and generates barcodes for UPC, EAN and Code 39 using various JavaScript functions.

This application requires JavaScript plug-in, which has to be initialised or installed. You also need Internet Explorer browser in your system. If you

ning, or else install the plug-in from the Internet or a genuine CD/DVD.

Main functions used in the source code are:

1. BarcodeGenerator(): It is used to generate the barcodes.
2. EAN13Generator.method(): It is used to calculate the checksum of the EAN-13 barcode.
3. getCode39Value(inputchar): It is

have the plug-in installed but currently disabled, you will get a warning message like "Click on the light-yellow bar above, choose 'Allow Blocked Content...'" Here you need to click 'Yes' option. Now you should see the application running,

EFY Note

The source code of this project is included in this month's EFY DVD and is also available for free download on www.efymag.com website.

used to get the input characters from the user.

When you run the code, you will get the program output as shown in Fig. 2.

Enter the code, say, '123456789222,' and 'EFY Enterprises.' Now press 'Display' button to get the EAN-13 code strip of bars and digits as shown in Fig. 3, where the last digit '1' on the right-hand side is the checksum.

To generate Code 39 barcode, enter the same digits below as shown in Fig. 3. Code 39 barcode is generated with "123456789222" digits just below the strip bars. ●
