Agilent Technologies' Digital & Wireless Test Symposium 2013 (ADWTS'13), which was held on September 3 and 5 at Bengaluru and Hyderabad, respectively, had provided a great opportunity to witness first-hand latest revolutionary technologies, view real world product demonstrations and presentations, and communicate with applications experts and industry experts.

Biometrics market to generate \$2 bn by 2018

As per India Biometrics Market Forecast & Opportunities, 2018, the biometrics market in India is supposed to generate revenues to the tune of \$2 billion by the year 2018.

Demand for biometric systems in India is higher compared to most of the developed nations in the world.

The initiative taken by the government of India with respect to identity of citizens such as e-passports, national

ID projects, UIDAI projects, employee benefit schemes are the major contributors to this rise in demand of biometric systems in India.

Tablet shipments to outdo PC in fourth quarter of 2013

Research conducted by market research firm IDC says that tablet shipments will outnumber the total number of PC shipments in the next (fourth) quarter of 2013. The firm also said that the tablet shipments will go above annual

PC shipments in 2013. Data suggests that the number of tablets shipped in the fourth quarter of 2013 will be somewhere around 84.1 million units. PC, on the other hand, will remain at 83.1 million units. The IDC also reported that the shipping of smartphones is going to pass 1.4 billion in 2013.

Further, the data showed that on an yearly basis, a total of 227.3 million units of tablets are expected to be shipped in the country. The report has also mentioned that the overall market for the smart connected devices is expected to grow by 27.8 per cent year-on-year in 2013.

Taiwanese company set to invest ₹ 500 million in India

With the current happenings in the Indian electronics industry and a boost from the government side, international electronics manufacturers are showing interest in investing in the country. Taiwan-based power backup provider, CyberPower Systems Inc. has revealed its plans to invest ₹ 500 million in the country. The company aims to sell its products including high-end UPS, USB car chargers and solar chargers.

According to an IANS report, Michael Ho, president, CyberPower, said, "We plan to invest ₹ 500 million over time to strengthen and expand our presence in the Indian market."

India, Japan to set up JWG to boost IT, electronics

India and Japan have already been brainstorming together on ways to work mutually to benefit the IT and electronics industries. Taking a step ahead, the two nations have now planned to set up a joint working group (JWG), which will work to facilitate investments and improve cooperation in information technology and electronics sector.

Commenting on the move, the trade and industry ministers of the two countries said in a joint statement, "Steps have been taken to form a joint working group for greater cooperation in the IT and electronics sector."
