World's First Curved Screen LED TV

Edge-to-edge curved construction of the TV gives better picture depth and feel to the viewers

The world's first curved screen LED television, KDL-65S990A, has been introduced by Sony and it will be made available to the public in October for \$3999.

The television has a curved visual panel along with the company's well-known Triluminous display colour system. This provides accurate pictures and deep and vibrant colours, enhancing the viewers' experience and providing a complete cinematic experience.

"The gentle curve of this television borrows from the screen technology found in movie theatres, and provides

an immersive experience that makes viewers feel as if they are truly part of the action and in the moment of the scene they are watching," *Sabce.com* quoted Mike Lucas, senior vice president of Sony electronics home entertainment & sound division, as saying.

The edge-to-edge curved construction of the television gives better picture depth and feel to the viewers along with a wider viewing angle, which means that the picture is the same irrespective of the angle from which you are watching it. In addition, the colour clarity and detailing in the television is also perfect with Sony's X-Reality PRO picture engine.

Price: \$3999

New Tablet with Dolby Digital Plug technology

Acer Iconia A3 tablet reduces background noise and boosts dialogue volume in a video or song

Acer has announced Acer Iconia A3 tablet. The company seems to have gone on a spree of launches, with many phones and desktop PCs being announced.

The new tablet features a 25.6cm (10.1-inch) screen and will support a screen resolution of 1280x800MP. In addition, it will have a 1.2GHz Cortex A7 quad-core processor along with a 5MP rear-facing camera. The device will run on the Android 4.2 Jelly Bean operating system and will have 16GB and 32GB variants.

According to reports, the company is marketing the new tablets' sound

quality. Apparently, the Acer Iconia A3 has Dolby Digital Plug technology, which will create a 5.1-channel surround sound experience when headphones are connected. It will reduce the background noise and will also have the capacity to boost dialogue volume in a video or song.

While Acer has not announced when the phone will be launched in the US, it is known that the Wi-Fi only variant of the phone will be up for sale in the Middle-East, Europe and Africa from early October. It will be priced at €249 (\$332) with the 3G model going up to €299 (\$399) and being launched in November.

Price: \$332 to \$399
